

# CAR TRACKING

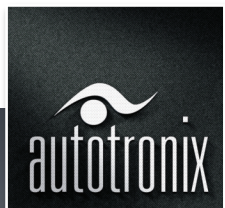

Protect your car with vehicle tracking products that:

- **Uses VHF, GPS & GSM location technology to recover cars fast**
- **Can overcome GPS/GSM signal jammers**
- **Activate via motion sensors that detect unauthorised movement**
- **Are Thatcham approved & comply with insurance industry standards**

TRACKER has led the way in stolen vehicle recovery for over 20 years and we are the only tracking provider supported nationwide by all UK police forces.

All TRACKER systems are recommended by major insurers helping you reduce your insurance premiums. Unlike GPS only tracking systems, the unique VHF signal emitted by TRACKER units cannot be jammed by GPS/GSM jammers. It also enables the police to locate vehicles even if they are hidden in underground car parks or containers.

Visit our website or call in today for more information on a product that is guaranteed to do the job.
